

ATHARV POL

Unity Game Developer | Gameplay Programmer

Pune, India | +91 9130833395 | polatharv1001@gmail.com

Portfolio | GitHub | Itch.io

Summary

Unity Game Developer with 2 game development internships, 20+ completed projects, and game jam experience with top-30% placements in large international game jams. Experienced in gameplay programming, enemy AI, state machines, physics systems, UI systems, and mobile game development using Unity and C#.

Technical Skills

Languages: C#, GDScript, Object-Oriented Programming

Game Development: Gameplay Programming, Enemy AI, State Machines, Physics Systems, UI Systems, Mobile Optimization, Rapid Prototyping

Tools: Unity, Godot, Git, GitHub, Aseprite

Experience

Gameplay Programmer Intern

Apr 2026 – Present

Aurelio Game Studio

- Implementing multiple gameplay systems, player interactions, and UI feedback features for a mobile game currently in development using Unity and C#.
- Collaborating with designers and developers to integrate gameplay improvements, bug fixes, and feature iterations across multiple development cycles.

Game Development Intern

Sep 2025 – Dec 2025

NexGen Edutainment Pvt. Ltd.

- Contributed to multiple mobile game reskin projects by modifying gameplay systems, UI elements, assets, and player interaction features.
- Assisted with testing, polishing, and production-ready implementation within a 3-month internship.

Projects

Don't Stall

Unity — AI — State Machines

- Designed a state-machine architecture supporting vehicle movement, adaptive ghost AI, health systems, and gameplay progression mechanics.
- Optimized gameplay systems to improve responsiveness and reduce frame stutter during gameplay.

It's Raining Cats and Dogs

Unity — Physics

- Implemented block placement mechanics featuring visual validation feedback and delayed physics activation systems.
- Achieved 390th place among 1483 entries in an international game jam competition.

Loop By Death

Unity — Platformer Mechanics

- Built coyote jump and jump buffering systems to improve platforming responsiveness and player control.
- Secured 2579th place among 9604 entries in the Pirate Software Game Jam.

Confidential Mobile Game

Current Internship Project

- Contributing as a Gameplay Programmer on a mobile game currently under development.
- Implementing gameplay systems and UI features; project details withheld due to studio confidentiality requirements.

Achievements

- Built and published 20+ game projects using Unity and Godot across arcade, puzzle, platformer, and mobile genres.
- Achieved 390th place among 1483 entries in the Brackeys Game Jam.
- Secured 2579th place among 9604 entries in the Pirate Software Game Jam.
- Served as Tech Co-Lead of the Arcade Game Development Club, supporting collaborative development projects and technical mentoring.

Education

Bachelor of Technology (B.Tech)

MIT ADT University, Pune

2022 – Present

Certifications

Unity & C# Programming Specialization (5 Courses)

University of Colorado
